HANIYA ZARSHAD

Software Engineer

Mahe, Puducherry, India — Phone: +91 9633472451 — Email: haniya.zarshad@gmail.com

PROFILE

Highly motivated and detail-oriented **Computer Science** graduate with hands-on experience in **software development** (**front-end**) and very much interested in **full stack development**. Passionate about building **responsive** and efficient **web applications**. Seeking opportunities to apply technical skills and contribute to innovative software projects.

WORK EXPERIENCE

Software Developer Intern **Jan 2026 - Feb 2026**

Facilio Technology Solutions Pvt. Ltd., Chennai

- Migrated the company website developers portal from **Docusaurus** framework to **React.js**, improving flexibility and performance.
- Developed **responsive UI components** using **React.js** and **Next.js**.
- Implemented **server-side features** using **Node.js**.
- Optimized website structure and **routing** for improved user experience.
- Gained practical experience in modern **frontend frameworks** and **full-stack development**.

Front-End Development Intern **Mar 2024**

Valenet Technologies, Puducherry

- Crafted **responsive web designs** that enhanced user engagement.
- Developed webpages using **HTML**, **CSS**, and **JavaScript**.

Data Science Trainee **Oct 2023 - Nov 2023**

Technook

- Completed structured training in **Data Science** concepts and applications.
- Learned **MFCC** (Mel Frequency Cepstral Coefficients) techniques for audio-based projects.

EDUCATION

B.Tech in Computer Science and Engineering **2022 - 2026**

Rajiv Gandhi College of Engineering and Technology

CGPA: 8.6

Higher Secondary Education **2020 - 2022**

Excel Public School, Mahe

Percentage: 92%

SKILLS

Technical Skills

- Programming Languages: **C**, **C++**, **Java**, **Python**
- Web Technologies: **HTML**, **CSS**, **React**, **Node.js**
- Database: **SQL**, Database Management
- Tools: **GitHub**, **VS Code**, Claude, Codex, Antigravity

Soft Skills

Solution-Oriented, **Teamwork and Collaboration**, **Adaptability**, **Communication**, **Continuous Learning**

PROJECTS

AI-Powered Hybrid Model for Heart and Lung Disease Detection

- Developed a **deep learning**-based hybrid model using **BiLSTM** and **BiGRU** to analyze heart and lung acoustic signals.
- Implemented **MFCC** feature extraction, preprocessing, and noise reduction to improve signal quality.
- Built and trained the model using **Python**, **TensorFlow**, and **Keras** for accurate disease classification.
- Improved early diagnosis by providing efficient and reliable healthcare predictions.

Early Warning System

- Developed an intelligent system to generate early alerts based on **data analysis**.
- Implemented **pattern recognition** techniques to detect anomalies and trigger warnings.
- Improved system reliability and responsiveness through **optimized processing**.

LANGUAGES

English (fluent), Malayalam (native), Hindi (fluent), Tamil (spoken), Arabic (written/reading)
